

■ Advanced Pectus Course ■

Course Objective:

The Advanced Pectus Excavatum Course is designed for surgeons who are currently doing the Nuss Procedure in their practice, but want to improve their results. Since its description by Dr. Nuss 15 years ago, the technique has changed markedly. Improved techniques for decreased bar rotation, elimination of intercostal stripping, and allowing safer passage of the bars under the sternum have been developed. The course will also cover modifications for adult pectus patients, techniques for recurrent or failed prior surgery, and modifications for mixed defects.

Course Highlights:

- Advanced Pectus Workshop: Solutions for complex patient repair, revision for recurrent or inadequately repaired pectus, repair of the adult pectus patient including breast implants, documenting physiologic issues and medical necessity
- Live Video Presentations: Children's Hospital of The King's Daughters, Phoenix Children's and Mayo Clinic Nuss Procedures
- Review of Current PE Literature & Evidence Based Medicine
- Ask the Experts: Q&A Discussions

This Course is presented by the Phoenix Children's Hospital/ Mayo Clinic Chest Wall Program and Children's Hospital of The King's Daughters.

Course Credit:

Phoenix Children's Hospital is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.
